

## Guidelines for **Data Sharing** and Paper Authorship

All sequencing data will be eventually made public in the standard repositories. Until then, the use of data will be discussed by the community, minding in particular those members who provided either the specimens or sequencing data.

LepEU strives to be maximally inclusive, and encourages Early Career Researchers to find a way to make more than a collection contribution, having some level of intellectual contribution to the project.

LepEU will keep track of individual efforts, by having a list of potential activities / contributions that people can select from.

The National Collection Coordinators will be involved not only in organizing sampling in their respective country but also in making sure that the collected specimens are registered and processed to be included in the LepEU biobank.

For a given publication, LepEU will send out a link to a Google Sheet where LepEU members can indicate their interest in authorship and their specific contributions to it, as well as provide information about their affiliation, email, and ORCID.

### Contribution categories to consider:

- |   |   |
|---|---|
| <input type="checkbox"/> Conceptualization              | <input type="checkbox"/> Maintenance or coordination of collection and of biobank |
| <input type="checkbox"/> Contributed samples            | <input type="checkbox"/> Writing first draft                                      |
| <input type="checkbox"/> Processing samples             | <input type="checkbox"/> Contributing to subsequent drafts                        |
| <input type="checkbox"/> Data collection                | <input type="checkbox"/> Regional coordinator                                     |
| <input type="checkbox"/> Protocol / experimental design | <input type="checkbox"/> Interpretation of results                                |
| <input type="checkbox"/> Involved in data analysis      | <input type="checkbox"/> Consortium membership / participation                    |
| <input type="checkbox"/> Involved in figure preparation | <input type="checkbox"/> Other (specify)  |
